What foods are in the grain group?

Any food made from wheat, rice, oats, cornmeal, barley or another cereal grain is a grain product. Bread, pasta, oatmeal, breakfast cereals, tortillas, and grits are examples of grain products.

Grains are divided into 2 subgroups, **whole grains** and **refined grains**.

Whole grains contain the entire **grain kernel** -- the bran, germ, and endosperm. Examples include:

- whole-wheat flour
- bulgur (cracked wheat)
- oatmeal
- whole cornmeal
- brown rice

Refined grains have been milled, a process that removes the bran and germ. This is done to give grains a finer texture and improve their shelf life, but it also removes dietary fiber, iron, and many B vitamins. Some examples of refined grain products

---

http://www.mypyramid.gov/pyramid/grains.html
are:

- white flour
- degermed cornmeal
- white bread
- white rice

Most refined grains are *enriched*. This means certain B vitamins (thiamin, riboflavin, niacin, folic acid) and iron are added back after processing. Fiber is not added back to enriched grains. Check the ingredient list on refined grain products to make sure that the word "enriched" is included in the grain name. Some food products are made from mixtures of whole grains and refined grains.

Some commonly eaten grain products are:

### Whole grains:
- brown rice
- buckwheat
- bulgur (cracked wheat)
- oatmeal
- popcorn

*Ready-to-eat breakfast cereals:*
- whole wheat cereal flakes
- muesli

- whole grain barley
- whole grain cornmeal
- whole rye
- whole wheat bread
- whole wheat crackers
- whole wheat pasta
- whole wheat sandwich buns and rolls
- whole wheat tortillas
- wild rice

*Less common whole grains:*
- amaranth
- millet
- quinoa
- sorghum
- triticale

### Refined grains:
- cornbread*
- corn tortillas*
- couscous*
- crackers*
- flour tortillas*
- grits
- noodles*

*Pasta*:
- spaghetti
- macaroni

- pitas*
- pretzels

*Ready-to-eat breakfast cereals*
- corn flakes

- white bread
- white sandwich buns and rolls
- white rice.
*Most of these products are made from refined grains. Some are made from whole grains. Check the ingredient list for the words "whole grain" or "whole wheat" to decide if they are made from a whole grain. Some foods are made from a mixture of whole and refined grains.

Some grain products contain significant amounts of bran. Bran provides fiber, which is important for health. However, products with added bran or bran alone (e.g., oat bran) are not necessarily whole grain products.
